

Social Media Messaging Kit

Te Pā Tūwatawata

AI and Māori data sovereignty — post copy, captions, hashtag sets, and campaign strategy for Twitter/X, Instagram, Facebook, TikTok, and Substack. Bilingual te reo Māori / English throughout. Use freely under CC BY-NC-SA 4.0. Created by The Kiwi Dialectic — www.kiwidialectic.com.

CAMPAIGN OVERVIEW

Course: Te Pā Tūwatawata — 6 modules, free, bilingual URL: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite
Substack: kiwidialectic.com Primary audience: Māori communities, educators, activists, tech workers Tone: Urgent. Direct. Unapologetic. Bilingual.

This kit contains: 6 module post sets (te reo + English) · platform-specific caption variants · hashtag strategy · thread templates · Substack excerpt copy · campaign timing guide

Platform Strategy

Different platforms require different approaches. The core message is the same — Māori data sovereignty is not a request, it is a right — but the format, length, and tone adapt to each platform's culture. This kit covers Twitter/X, Instagram, Facebook, TikTok, and Substack.

Twitter / X

280 characters max. Lead with te reo Māori — it interrupts the scroll. Use the bilingual format: te reo first, then English translation below. One strong claim per tweet. Always include course link. Post the meme image as the visual, with the tweet copy as caption.

- Post the te reo headline alone — no explanation. Let it sit.
- Follow with a reply: the English translation + course link.
- Use thread format for longer arguments (see thread templates, p.5).
- Post times (NZT): 7–9am, 12–1pm, 7–9pm for NZ audience.
- Cross-post to international audiences at 9am EST / 6pm BST.

Instagram

Visuals first. The meme is the post — use it full-size (1080×1080). Caption can be longer (up to 2,200 chars) but most people read only the first line. Lead with the bilingual headline, follow with body copy, end with hashtags.

- Put the te reo headline in the first line of the caption — visible without 'more'.
- Use line breaks generously — short lines, white space.
- Hashtags at the end (not inline) — use 10–15 targeted tags.
- Stories: use the image + poll sticker: 'Ko wai nāu i hanga? / Who built this?'

Facebook

Longer captions work here. Facebook audiences tolerate — and often prefer — more context. Use the full bilingual post copy. Tag relevant groups: Māori digital rights, AI ethics, NZ political groups.

- Post the meme image + full bilingual caption.
- Share into relevant groups: Māori data sovereignty, NZ politics, education.
- Include the course link prominently — Facebook drives click-through better than X.
- Events: create a Facebook event for each module launch.

Substack

This is where depth lives. Use the course modules as Substack posts — each module becomes a long-form piece. The social posts drive traffic here.

- Publish each module as a Substack post with the meme as the header image.
- Lead with the bilingual headline, then expand into the full analysis.
- Include a 'Download the teaching kit' CTA in every post.
- Cross-post note to Twitter/X: 'Full piece on Substack — link in bio.'

TikTok

TikTok is video-first but text hooks matter. Open with the te reo Māori tagline as on-screen text (first 1–2 seconds). Use text overlays, not just voiceover — te reo on screen normalises the language and interrupts the algorithm. The meme images work as static TikTok slides (use the 'photo mode' / carousel feature).

- Hook (0–2 sec): Te reo headline as large on-screen text — e.g. 'Kei te kainga tō koutou reo.'
- Context (2–8 sec): English translation in smaller text below, with course URL.
- Body (8–30 sec): Use the meme image as background; overlay key stats or quotes.
- CTA (final 3 sec): 'Te Pā Tūwatawata — free course — kiwidialectic.com. Link in bio.'
- Carousel / photo mode: post all 6 memes as a swipe series with bilingual captions.
- Sounds: use royalty-free waiata or taonga puoro (traditional instruments) — not trending audio.
- Post times (NZT): 6–9pm weekdays, 10am–1pm weekends for NZ reach.
- Hashtags: #TeReoMāori #DataSovereignty #AotearoaAI #TikTokNZ #IndigenousData #KaupapaMāori

Module Post Copy

For each module: a short post (Twitter/X), a medium post (Instagram/Facebook), a TikTok caption/script, a long post (Substack excerpt), and hashtag set. All copy is free to use and adapt under CC BY-NC-SA 4.0. Created by www.kiwidialectic.com.

MODULE 1 • KORU

Whakapapa o te raraunga — The genealogy of data

Motif symbolism: New life, growth, perpetual movement

Short post (Twitter/X, ~280 chars)

Ko wai nāu i hanga?
Ko wai ōu raraunga e tiaki ana?
He whakapapa tō ō raraunga.

Who built this — and for whom?
Who controls your data?
Every dataset has a genealogy.

Free course on AI & Māori data sovereignty
robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~260 chars (short post fits in one tweet)

Medium post (Instagram / Facebook caption)

Ko wai nāu i hanga?

Every AI system has a whakapapa — a genealogy. It was built by someone, funded by someone, trained on someone's knowledge.

When that knowledge is Māori — extracted without consent, without return, without acknowledgement — the AI system becomes a continuation of raupatu.

Te Pā Tūwatawata is a free 6-module course on AI and Māori data sovereignty. Module 1 starts with the most fundamental question: who built this, and whose knowledge does it run on?

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

Ko wai nau i hanga? / Who built this AI?

CONTEXT (2-8 sec):

AI companies train on Maori language without consent.

This is raupatu — digital dispossession.

CTA (final 3 sec):

Learn more — Te Pa Tuwatawata, free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

The koru unfurls — but who planted the fern?

In te ao Māori, everything has a whakapapa. The koru — the spiral of the silver fern frond — carries the knowledge that every new thing grows from something older: from the earth, from the ancestors, from the people who tended the land before us.

AI systems, we are told, appear fully formed from nowhere — products of computation, not of history. But every large language model has a whakapapa too: training data gathered from the internet, from books, from digital archives. And in that training data is te reo Māori, carved into forums and government sites and language-learning tools by Māori people who were not asked, were not paid, and were not told.

This is not a new form of theft. It is the same theft, made digital.

— Module 1: Whakapapa o te raraunga | The Kiwi Dialectic

Hashtag set:

**#DataSovereignty #TinoRangatiratanga #AotearoaAI #TeReoMāori #KaupapaMāori #AIEthics
#IndigenousData #Whakapapa**

MODULE 2 · PĀ TŪWATAWATA

Te Pā Tūwatawata hei tauira — The palisade as model

Motif symbolism: Protection, governance, community structure

Short post (Twitter/X, ~280 chars)

He pā matihiko nō tātou katoa.

Ārahina tō pā ake.

A digital palisade — built by us, for us.

Build your own.

Free course on community data infrastructure:

robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~240 chars (short post fits in one tweet)

Medium post (Instagram / Facebook caption)

He pā matihiko nō tātou katoa.

The pā tūwatawata is not just a fortress — it is a model of governance. The palisade protects what is inside; the community decides what enters and what does not.

Right now, our data lives inside someone else's pā. Facebook's pā. Google's pā. OpenAI's pā.

Module 2 of Te Pā Tūwatawata asks: what would it mean to build our own?

Community-controlled data infrastructure is not a utopia — it is a practice. It starts with the question: who holds the gate?

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

He pa matihiko no tatou katoa. / A digital pa — built by us.

CONTEXT (2-8 sec):

Our data lives inside someone else's pa.

Facebook's pa. Google's pa. OpenAI's pa.

CTA (final 3 sec):

Build your own — Te Pa Tuwatawata, free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

The pā was not a wall — it was a decision.

Every palisade stake driven into the earth was a statement about what belongs inside and what must remain outside. The pā tūwatawata was not built to keep the world out — it was built to protect the world within: the people, the food, the taonga, the relationships that made life possible.

We need digital pā. Not as a metaphor — as architecture.

Community-controlled servers. Iwi-governed data repositories. Open-source tools built by and for Māori communities. Infrastructure that answers to tikanga, not to shareholders.

The technology exists. The question is who we allow to build it — and on whose terms.

— Module 2: Te Pā Tūwatawata hei tauira | The Kiwi Dialectic

Hashtag set:

#DigitalPā #IndigenousTech #DataSovereignty #KaupapaMāori #CommunityData #TechJustice #AotearoaAI

MODULE 3 • NIHO TANIWHA

AI me te raupatu matihiko — AI and digital dispossession

Motif symbolism: Protection, boundaries, the guardian at the threshold

Short post (Twitter/X, ~280 chars)

Kei te kainga tō koutou reo.

Ko te raupatu matihiko tēnei.

Me tū tātou.

They are eating your language.

This is digital dispossession.

We must stand.

Free course — AI and Māori data sovereignty:

robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~250 chars (short post fits across 2 tweets)

Medium post (Instagram / Facebook caption)

Kei te kainga tō koutou reo.

AI companies train their models on te reo Māori — scraped from websites, kōrero recorded without permission, language data extracted from tools built by Māori communities with Māori funding.

They did not ask. They did not pay. They did not return anything.

The niho taniwha marks the boundary. Module 3 of Te Pā Tūwatawata asks: who has the right to cross this threshold? And what are we willing to do to defend it?

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

Kei te kainga to koutou reo. / They are eating your language.

CONTEXT (2-8 sec):

AI companies extract te reo Maori — no consent, no return.

This is digital colonialism. This is raupatu.

CTA (final 3 sec):

Me tu tatou. We must stand. Te Pa Tuwatawata — free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

Raupatu did not end. It became digital.

In the 19th century, the Crown took the land through legislation, purchase under duress, and outright confiscation. The mechanism was new; the logic was old: that what belongs to Māori can be taken when it becomes valuable enough to take.

AI companies are operating on the same logic. Te reo Māori is valuable — not to its speakers, who have always known this, but to the market, which has only recently noticed. And so it is extracted: from websites, from apps, from the digital traces of a language community fighting to survive.

The niho taniwha — the teeth of the guardian — marks where this ends.

— Module 3: AI me te raupatu matihiko | The Kiwi Dialectic

Hashtag set:

**#RaupauMatihiko #AIColonialism #TeReoMāori #DataJustice #IndigenousData
#TinoRangatiratanga #AotearoaAI #DigitalRights**

MODULE 4 · KŌWHAIWHAI

Tikanga, ture, mana whakahaere — Tikanga, law, and governance

Motif symbolism: Whakapapa encoded in pattern — the genealogy of law

Short post (Twitter/X, ~280 chars)

Ko te tikanga te ture tuatahi.
Ko te ture hei tautoko, kaua hei huri.

Tikanga is the first law.
Statute supports it — it does not override it.

Free course on Indigenous data governance:
robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~230 chars (short post fits in one tweet)

Medium post (Instagram / Facebook caption)

Ko te tikanga te ture tuatahi.

Existing law — the Privacy Act, the Copyright Act, the AI governance frameworks now being developed — was not written for Māori communities. It was written for individuals and corporations.

Tikanga does not fit that frame. Tikanga is collective, relational, genealogical. It understands data as taonga — as something inherited, held in trust, carrying the mana of the people it comes from.

Module 4 of Te Pā Tūwatawata argues that tikanga must govern AI built on Māori knowledge — not as a supplement to law, but as its foundation.

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

Ko te tikanga te ture tuatahi. / Tikanga is the first law.

CONTEXT (2-8 sec):

Existing law was not written for Maori communities.

Tikanga must govern AI built on Maori knowledge.

CTA (final 3 sec):

Module 4 — Te Pa Tuwatawata, free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

The kōwhaiwhai is not decoration. It is law.

Every pattern on the rafters of a wharenuī encodes the whakapapa of the people who built it. The patterns are a legal document — a record of relationships, obligations, and rights. To understand the rafter pattern is to understand who you are accountable to.

We are being asked to accept AI governance frameworks built by people who have no whakapapa to this place. Frameworks that treat data as property, knowledge as a commodity, and consent as a checkbox.

Tikanga does not treat data as property. It treats data as a relationship. The question is not 'do you own this?' but 'who are you to this knowledge, and what do you owe it?'

That is the question our AI governance frameworks need to answer.

— Module 4: Tikanga, ture, mana whakahaere | The Kiwi Dialectic

Hashtag set:

**#Tikanga #DataGovernance #IndigenousData #KaupapaMāori #AotearoaAI #AIPolicy
#TinoRangatiratanga #TeWaitangi**

MODULE 5 · UNAUNAHĪ

Hoahoa tika — Ethical design

Motif symbolism: Interconnection — every scale carries the whole

Short post (Twitter/X, ~280 chars)

He aha te tikanga o tō hoahoa?

Ko ia ia kōpaki he kawenga.

What does your design serve?

Every layer of a system carries responsibility.

Free course on ethical AI design:

robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~215 chars (short post fits in one tweet)

Medium post (Instagram / Facebook caption)

He aha te tikanga o tō hoahoa?

The unaunahi — the fish-scale pattern — works in layers. Each scale overlaps the next; the whole is stronger for it. Remove one scale and the armour fails.

AI systems are the same. Community, data, algorithm, governance: each layer carries responsibility for the whole. Ethical AI is not a feature you add at the end. It is the foundation you build from the beginning.

Module 5 of Te Pā Tūwatawata asks: what would it mean to design an AI system from the community outward — rather than from the product inward?

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

He aha te tikanga o to hoahoa? / What does your design serve?

CONTEXT (2-8 sec):

Every layer of an AI system carries responsibility.

Ethical design is not a feature — it is a foundation.

CTA (final 3 sec):

Module 5 — Te Pa Tuwatawata, free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

Ethical design is not a layer you add. It is the material you build with.

Every technology encodes a set of values. The question is not whether your design is political — it is always political — but whose politics it serves.

When OpenAI trains a model on te reo Māori without consent, that is a design decision. When a facial recognition system performs poorly on Māori faces, that is a design decision. When an algorithmic welfare system cuts benefits disproportionately in Māori communities, that is a design decision.

These are not accidents. They are the predictable outputs of systems designed without accountability to the communities they affect.

The unaunahi reminds us: every scale interlocks. Every decision ripples. Design with that knowledge — or design against it.

— Module 5: Hoahoa tika | The Kiwi Dialectic

Hashtag set:

**#EthicalAI #HoahoaTika #IndigenousDesign #DataSovereignty #AIEthics #KaupapaMāori
#TechJustice**

MODULE 6 • TAKARANGI

He anamata rangatira — A sovereign digital future

Motif symbolism: Balance of opposites — past and future inseparable

Short post (Twitter/X, ~280 chars)

Ko tātou te anamata.

Ko ngā tīpuna, ko ngā uri — kotahi anō te ara.

We are the future.

Ancestors and descendants — one spiral, one path.

Free course — build the sovereign digital future:

robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

~230 chars (short post fits in one tweet)

Medium post (Instagram / Facebook caption)

Ko tātou te anamata.

The takarangī is a double spiral — the past and the future, inseparable. Everything we build carries the weight of what came before and the responsibility of what comes after.

A sovereign digital future is not a destination. It is a practice: of consent, of accountability, of building technology that answers to the people it serves — not to investors, not to quarterly reports.

Module 6 of Te Pā Tūwatawata closes the course with a question: what are you going to build?

Link: robertmccallnz.github.io/kiwi-dialectic-te-pa-minisite

TikTok caption / script

HOOK (on-screen text, 0-2 sec):

Ko tatou te anamata. / We are the future.

CONTEXT (2-8 sec):

The double spiral: ancestors and descendants — inseparable.

A sovereign digital future honours both.

CTA (final 3 sec):

Module 6 — Te Pa Tuwatawata, free course.

Link in bio. Created by www.kiwidialectic.com

Long-form excerpt (Substack / blog)

He anamata rangatira — a chiefly future. A sovereign future.

Rangatira does not mean 'leader' in the Western sense. A rangatira is someone who weaves people together — who holds the threads of the community and is accountable to them. Tino rangatiratanga is not domination; it is the responsibility of self-determination.

A sovereign digital future looks like this: communities that control their own data, their own platforms, their own algorithms. Technologies that are governed by tikanga and accountable to iwi. AI systems that speak te reo, understand whakapapa, and were built with the people they serve — not extracted from them.

This is not impossible. It is already beginning. You are already part of it.

Ko tātou te anamata. We are the future.

— Module 6: He anamata rangatira | The Kiwi Dialectic

Hashtag set:

**#TinoRangatiratanga #AnamataRangatira #MāoriAI #DataSovereignty #IndigenousFutures
#AotearoaAI #KaupapaMāori**

Thread Templates

Twitter/X threads perform well for educational content. These templates give you a structure — fill in your own analysis.

The Raupatu Thread

A thread on why AI training on Māori data without consent is dispossession.

- 1/ Ko wai nāu i hanga? Who built this AI — and whose knowledge does it run on?
- 2/ Every large language model is trained on data gathered from the internet. That data includes te reo Māori — scraped without consent.
- 3/ This is not a new story. Māori knowledge has been extracted, commodified, and sold back at a profit for 200 years. AI is the new mechanism.
- 4/ The legal system offers little protection. Copyright protects individual works; it does not protect a living language.
- 5/ Tikanga offers a different framework: knowledge as taonga, held in trust, with obligations to the people it comes from.
- 6/ Te Mana Raraunga have published the Māori Data Sovereignty principles. They are clear. The AI industry has not listened.
- 7/ Module 3 of Te Pā Tūwatawata: AI me te raupatu matihiko. Free course. [link]

The Pā Thread

A thread on building community-controlled digital infrastructure.

- 1/ Our data lives in someone else's pā. Facebook's pā. Google's pā. OpenAI's pā. That needs to change.
- 2/ The pā tūwatawata is a governance model, not just a fortress. The community decides what enters and what does not.
- 3/ We need digital pā. Iwi-governed data repositories. Open-source tools built by Māori communities. Infrastructure that answers to tikanga.
- 4/ This is not impossible. Indigenous data infrastructure projects exist: @TeManaRaraunga, @Māori_AI, community data trusts in Canada and Australia.
- 5/ The technology is not the barrier. The question is funding, governance, and political will.
- 6/ Module 2 of Te Pā Tūwatawata: Te Pā Tūwatawata hei tauira. Free course. [link]

Campaign Timing Guide

Spread the 6-module campaign over 6 weeks, one module per week. This keeps the course active in feeds without overwhelming followers.

Day	Content
Monday	Launch post — short Twitter/X post with meme image + course link
Tuesday	Deep dive — Substack post / long-form excerpt
Wednesday	Thread — use thread template, engaging format
Thursday	Quote tweet / reshare — amplify relevant news or partner accounts
Friday	Call to action — direct enrolment push, share toolkit PDF link
Weekend	Community engagement — reply to comments, share student work

Key dates (2026)

Align campaign launches with dates significant to Māori digital rights and political calendar:

- 6 February — Waitangi Day. Launch Module 4 (Tikanga, ture, mana whakahaere). Frame around Treaty obligations and AI.
- 28 May — Budget Day NZ. Launch economic critique angle — who funds AI, who profits.
- June–July — Matariki season. Launch Module 6 (He anamata rangatira). Frame around Māori new year and futures.
- October — UN Indigenous Peoples' Day (9 August) retrospective. Review + repost high-performing content.
- November — Te Wiki o te Reo Māori (Māori Language Week). Launch or relaunch Module 1 (Whakapapa o te raraunga).
